Get Spire Right the First Time.

Spire ERP is a powerful platform. Getting the most from it takes more than installation—it takes an experienced partner who understands your business, your data, and your industry. Cortexx has implemented Spire for decades, helping Canadian businesses go live cleanly, confidently, and without disruption.

What Our Implementations Include

Discovery & Scoping

We learn your business first — workflows, data structures, integrations, and reporting needs. No assumptions. Every engagement is scoped fresh.

Data Migration

Clean, validated migration from your legacy system. We map, transform, and verify every record before go-live. No surprises on day one.

Configuration & Setup

Chart of accounts, inventory, pricing, payroll, purchasing—configured to match the way your business runs, not how Spire runs by default.

System Integrations

Connect Spire to your e-commerce, shipping carriers, payment processors, and EDI. We handle the technical work so your systems talk to each other.

Staff Training

Role-based training for every user — warehouse floor to executive team. Everyone leaves confident and ready to use Spire from day one.

Go-Live Support

We stay close through go-live and the weeks that follow. Fast response, real accountability, and a partner who knows your setup inside and out.

Why Choose Cortexx

Authorized Spire Partner
Certified Spire partner with a track record of clean, on-time implementations across Canada.

30 Years of ERP Experience
We have been doing this since before Spire was Spire. That depth shows on every project.

We Also Build on Spire
As creators of Nexus for Spire, we understand the platform deeper than most. That knowledge shapes every implementation we deliver.

No Outsourcing
The team you meet is the team that does the work. Always.

What is Spire ERP?

Spire is a Canadian-built ERP for distribution, wholesale, and manufacturing. It covers inventory, order management, purchasing, AR, AP, payroll, and GL—all in a single integrated platform built for the Canadian market.

- Built for Canadian distributors & manufacturers
- Strong inventory & order management
- Integrated payroll & GL
- Active Canadian partner network
- Scalable from SMB to mid-market

AI querying, live dashboards, workflow automation, and a full library of add-on modules—built on top of your Spire data.
