

## Get Spire Right the First Time.

Spire ERP is a powerful platform. Getting the most from it takes more than installation -- it takes an experienced partner who understands your business, your data, and your industry. Cortextx has implemented Spire for decades, helping Canadian businesses go live cleanly, confidently, and without disruption.

### What Our Implementations Include

#### Discovery & Scoping

We learn your business first -- workflows, data structures, integrations, and reporting needs. No assumptions. Every engagement is scoped fresh.

#### Data Migration

Clean, validated migration from your legacy system. We map, transform, and verify every record before go-live. No surprises on day one.

#### Configuration & Setup

Chart of accounts, inventory, pricing, payroll, purchasing -- configured to match the way your business runs, not how Spire runs by default.

#### System Integrations

Connect Spire to your e-commerce, shipping carriers, payment processors, and EDI. We handle the technical work so your systems talk to each other.

#### Staff Training

Role-based training for every user -- warehouse floor to executive team. Everyone leaves confident and ready to use Spire from day one.

#### Go-Live Support

We stay close through go-live and the weeks that follow. Fast response, real accountability, and a partner who knows your setup inside and out.

### Why Choose Cortextx

#### Authorized Spire Partner

Certified Spire partner with a track record of clean, on-time implementations across Canada.

#### 30 Years of ERP Experience

We have been doing this since before Spire was Spire. That depth shows on every project.

#### We Also Build on Spire

As creators of Nexus for Spire, we understand the platform deeper than most. That knowledge shapes every implementation we deliver.

#### No Outsourcing

The team you meet is the team that does the work. Always.

### What is Spire ERP?

Spire is a Canadian-built ERP for distribution, wholesale, and manufacturing. It covers inventory, order management, purchasing, AR, AP, payroll, and GL -- all in a single integrated platform built for the Canadian market.

- Built for Canadian distributors & manufacturers
- Strong inventory & order management
- Integrated payroll & GL
- Active Canadian partner network
- Scalable from SMB to mid-market

### Already on Spire? Take it further with Nexus for Spire.

AI querying, live dashboards, workflow automation, and 17+ add-on modules -- built on top of your Spire data.
